COMMUNICATIONS: Richard McGuire, Chairman – **N/A**

DRILL: Mike Estes, LOTTE Chemical, Chairman –

Discussed – Upcoming Annual Drills that meet EPA requirements

EMS 8 HEALTHCARE: Mark Conner, Acadian Ambulance, Chairman –

Louisiana Region R5 ESF-8 Health & Medical Coalition Meeting met on Monday, August 22, 2022, to discuss:

• **School Active Shooter Exercise, Lesson Learned from Beauregard-Scott Greenmun, BOHSEP:**

☞ Scott Greenmun, BOSHEP, shared strengths and lessons learned during the two School Shooting drills conducted earlier this month

☞ **Key Goals Included:**

- Communication
- Response time
- Coordination between public officials and school employees

☞ **Strengths:**

- Great participation with law enforcement and Beauregard Parish schools
- Response time for both exercises was good
- The new Sheriff's office sub-station in East Beauregard proved to be a successful asset
- School resource officers responded quickly and effectively
- In East Beauregard, SRO neutralized the shooter quickly and included pursuing the perpetrator through a window

☞ **Areas for improvement:**

- Communication- Radios did not work well in schools
- Scott shared that on some campuses, there is no reception with radios

• **School Shooting Exercise Planning:**

- ☞ Liz Harmon shared the basic scenario for the school shooting exercise designed for hospitals that will receive the victims of the shootings
- ☞ A tabletop exercise will be conducted during the next R5 ESF-8 Health and Medical Coalition meeting
- ☞ Considerations are listed in the PP, and Liz requested each hospital use the PP to guide the Safety Committees in planning how they will participate in the exercise
- ☞ Liz requested each hospital's Emergency Prep Coordinator share the outcome of the exercise discussion to help prepare for the upcoming tabletop exercise.
- ☞ The functional exercise is tentatively scheduled for early November

• **Dr. Cavanaugh Update:**

☞ Dr. Cavanaugh shared the latest CDC Covid quarantine and isolation guidance

☞ **Taken from CDC website:**

- Recommending that instead of quarantining if you were exposed to COVID-19, you wear a high-quality mask for 10 days and get tested on day 5
- Reiterating that regardless of vaccination status, you should isolate from others when you have COVID-19
- You should also isolate if you are sick and suspect that you have COVID-19 but do not yet have test results
- If your results are positive, follow CDC's full isolation recommendations
- If your results are negative, you can end your isolation
- Recommending that if you test positive for COVID-19, you stay home for at least 5 days and isolate from others in your home. You are likely most infectious during these first 5 days. Wear a high-quality mask when you must be around others at home and in public
- If after 5 days you are fever-free for 24 hours without the use of medication, and your symptoms are improving, or you never had symptoms, you may end isolation after day 5
- Regardless of when you end isolation, avoid being around people who are more likely to get very sick from COVID-19 until at least day 11
- You should wear a high-quality mask through day 10
- Recommending that if you had moderate illness (if you experienced shortness of breath or had difficulty breathing) or severe illness (you were hospitalized) due to COVID-19 or have a weakened immune system, you need to isolate through day 10
- Recommending that if you had severe illness or have a weakened immune system, consult your doctor before ending isolation. Ending isolation without a viral test may not be an option for you. If you are unsure if your

symptoms are moderate or severe or if you have a weakened immune system, talk to a healthcare provider for further guidance

➤ Clarifying that after you have ended isolation, if your COVID-19 symptoms worsen, restart your isolation at day 0. Talk to a healthcare provider if you have questions about your symptoms or when to end isolation

➤ Recommending screening testing of asymptomatic people without known exposures will no longer be recommended in most community settings

➤ Dr. Cavanaugh also provided an update on Monkeypox

➤ Vaccines are available for individuals who meet the criteria at the Health Unit in Lake Charles

- **Introducing New Clinical Advisor Crystal Rollins:**

➤ Liz welcomed Crystal Rollins, MSN, RN, CEN, TCRN, Clinical Director, Emergency Department who has agreed to take on the role of clinical advisor for the R5 ESF-8 Health and Medical Coalition

➤ People with monkeypox in the current outbreak generally report having close, sustained physical contact

- **School Active Shooter Scenario Suggestions:**

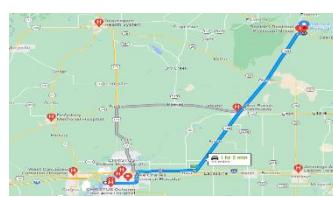

➤ Shooting happens when students are outside/(***End of Day or Fire Alarm pulled, classes evacuated?***)

➤ Multiple pediatric injuries

➤ Parents picking up kids, see other kids injured, and put them in POV to get to hospitals

➤ Multiple agency response closes 165, parents use back roads to get to rural hospitals.

➤ Ambulance response time/(***Can't enter school until the scene is secured and will have law enforcement escorts***)

- **School Active Shooter Scenario Suggestions:**

➤ Copycat shooter attacks Sulphur High School at end of the day. Students are in the Courtyard and waiting for bus transport

➤ Students are injured from the shooting and the chaos of trying to exit the scene

➤ Students quickly go to POV and exit the scene with injured peers they can help

➤ Campus locks down

➤ Lock down impacts West Cal Cameron Hospital

➤ Students begin presenting to WCCH ER

➤ Some go north to escape surge at West Cal Cam. Present to DeQuincy Memorial and Beauregard Health Systems emergency rooms

➤ Ambulances arrive, EMTs are allowed to enter the scene, LERN directs patient movement

- **Next R5 ESF-8 Health & Medical Coalition Meeting:**

➤ Monday, September 26, 2022, at 2:30PM/OHSEP
